NAUFAL AZIZ ALBAAQIE

Tangerang, Indonesia | 085155294499 | naufaljct48@gmail.com | linkedin.com/in/naufal-aziz/

SUMMARY

Web developer with a Bachelor's degree in Information Systems from Raharja University. Skilled in full-stack development, including PHP, JavaScript, Python, and SQL. Experienced in building efficient applications, optimizing databases, and implementing *API* integrations. Passionate about delivering innovative digital solutions and seeking opportunities to further enhance my expertise in web development.

EXPERIENCE

RS Kanker Dharmais – Jakarta, Indonesia
Full Stack Developer (January 2024 - Present)

- Developed ATiDar (Aplikasi Transfusi Darah) with seamless integration between machines and the application to optimize the transfusion process.
- Created Regforis (Registrasi Formularium Rumah Sakit Kanker Dharmais) to digitize the registration of medicines and medical equipment.
- Created SiKevin (Sistem Informasi Keuangan dan Verifikasi Pasien) an application that reduced monthly service data retrieval time, reducing processing time from 30 minutes to an impressive 30 seconds.

PD. BATARA MEMBANGUN – Kalimantan Tengah, Indonesia
Full Stack Developer - Remote (2023)

- Crafted a captivating landing page through the creative utilization of WordPress CMS.
- Amplified user engagement and bolstered our digital footprint.
- Paved the way for enhanced online interactions and brand visibility.

DEKAVAPE – Tangerang, Indonesia
Founder (June 2020 – January 2022)

- Established and managed a successful vape store business, specializing in selling vaping devices and related hardware.
- Developed a robust and efficient Point of Sales (PoS) system for seamless transactions.
- Implemented and managed a MySQL database for effective inventory management and business operations.

TURBO PANEL – Tangerang, Indonesia
Founder (February 2016 – February 2017)

- Developed a professional Social Media Marketing (SMM) website dedicated to selling Instagram or Twitter followers and likes.
- Using APIs to connect with social media platforms like Instagram or Twitter allows for automating specific tasks and expanding website functionality.
- Implemented effective database management using MySQL for secure data storage and efficient access.
